## Ch.1 Giant Panda's Body

*It's so interesting to learn about pandas body. Let me tell you one fact about pandas body. They can weigh 200 to 300 pounds. They have sharp teeth their fur is black and white .Another fact about pandas is that they can climb trees with their big large body and with their sharp nails. And pandas in zoos are also friendly because their cute and they play with their cubs. The third fact about pandas is they are wild animals because some of them are in trouble because people want to hunt them down them down for food! My final fact about pandas is they're very hungry animal because they eat bamboo shoots almost for the whole day. I hope you enjoyed learning about pandas because I surely did.*

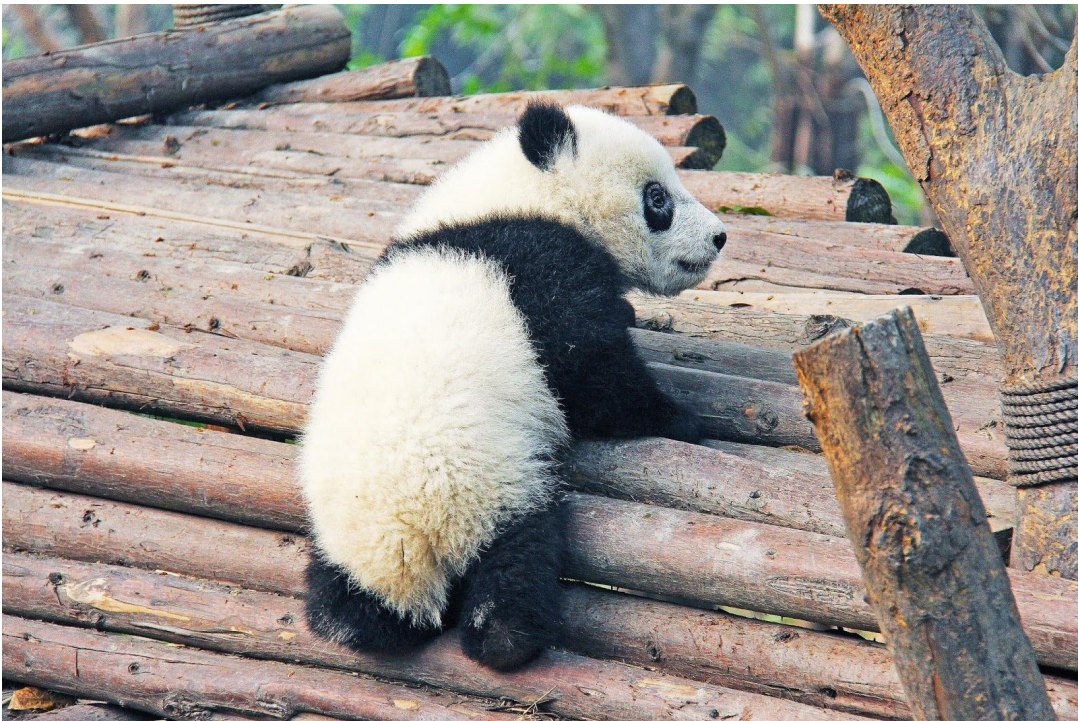

## Ch.2 Giant panda's Diet

*What animal eats bamboo almost for the whole day? Pandas of course. My first fact about a panda's diet is pandas can eat bamboo shoots almost for the whole day. Also, pandas could eat stems if they can't find bamboo shoots. A third fact about panda's diet is they can eat leaves when they're hungry. The last and final fact a panda's diet is that they can eat about 85 pounds (39 kilograms) every day. Bye panda's fam, hope you enjoyed learning about a panda's diet.*

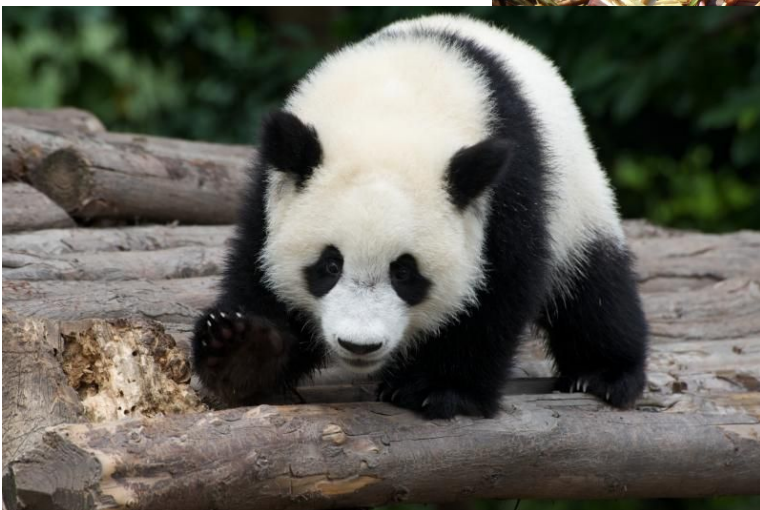

## Ch:3 A Panda's Habitat

*Hello today you will be learning about panda's **habitat**. My first fact about a panda's habitat is that they can live in **continents** Asia in country of china. Also giant panda's can make their home out of bamboo. A third fact about a panda's habitat is that they can live in high trees. Another fact about a panda's habitat is that they can live in grassland in zoos hope you learned a lot about a panda's habitat.*

## Ch:4 A Panda's Life Cycle

*Have you ever heard of the panda's life cycle well, come along with me and I will tell you all about it. One fact about a panda's life cycle is that baby pandas are called cubs. Another fact about a panda's life cycle is that a mother panda gives birth each year. My third fact about panda's life cycle is that a mother panda pandas are related to raccoons and red pandas. Now you know all about the panda's life cycle.*

## Glossary
